

Universal Remote Controls from Sony

Sony has developed a wide range of high quality and multi-functional remote controls for your Audio-Video apparatus. From user-friendly and ergonomic remotes to multi-component high-end remotes with learning functionality and EL organic display, there is a remote control to suit every need.

Remote Controls range

High-end Remote Controls

RMVL1400T and RMVL600T
Universal Learning Remote Commander

Mid-range Remote Controls

RMV210T
Ergonomic preset universal remote commander

Entry-Level Remote Controls

RMEZ2T
Easy-to-use Universal Remote Commander

Features and Benefits*

Learning Functionality

- Learning function for programming which enables easy copying of remote control functionalities of other components

Multiple Component Control

- With the one-touch system control, synchronising operational status on remote and alternate components is done with ease

Ergonomic and user-friendly button lay-out and design

- The ergonomic design and easy-to-use rubber buttons enable comfortable use and fit in the hand
- Centrally located main buttons facilitate quick control of components and blind operation

Preset programs compatible with Sony and most major brands

- Components of different brands can be programmed onto one remote commander, no longer requiring separate remotes for different devices

Bright, easily readable organic EL display and illuminated buttons

- The EL display and illuminated buttons allow for ease of use in the dark
- Memo function for registration of learned commands and individual controls to be registered and displayed on the organic EL help remind you what has been programmed to each button

Memory back-up function

- Memory back-up function eliminates need to reset code-numbers after changing the batteries
